Technical Data Sheet Top View LED

Part No.	PLCC2XW6			
Emitted Color	Dominant White Face Color White			
Chip Material	InGaN/GaN	Package	PPA	

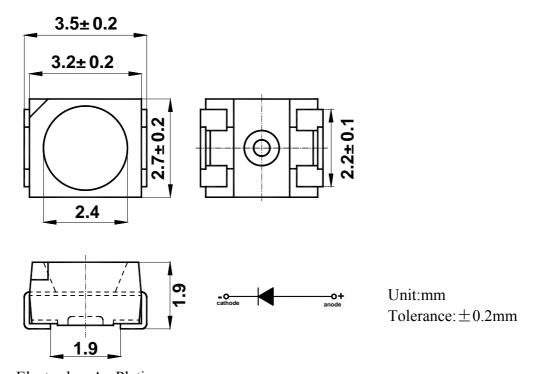

◆ Features:

Compatible with automatic placement equipment
Compatible with reflow solder process
Low power consumption and wide viewing angle
This product doesn't contain restriction Substance, comply ROHS standard.

◆ Applications:

Automotive and Telecommunication
Flat backlight for LCD ,switch and symbol in telephone and fax
General use for indicators
Indoor lighting

◆ Package Dimensions:

Electrodes: Ag Plating

Encapsulating Resin: Silicone with phosphor

Technical Data Sheet Top View LED

◆ Absolute Maximum Rating (Ta=25°C)

Parameter	Symbol	Max.	Unit
Power Dissipation	P_{M}	105	Mw
Pulse Forward Current	I_{FP}	100	mA
DC Forward Current	I_{F}	30	mA
Reverse Voltage	V_R	5	V
Operating Temperature Range	Topr	-30℃ ~85℃	${\mathbb C}$
Storage Temperature Range	Tstg	-40℃ ~ 100℃	${\mathbb C}$

^{*} I_{FP} condition: pulse width $\leq 1 \text{ms}$, duty cycle $\leq 1/10$

◆ Electrical Optical Characteristics (Ta=25°C)

Parameter	Symbol	Min	Тур.	Max.	Unit	Test Condition
Luminous Intensity	I_{V}	1860			mcd	$I_F = 20 \text{mA}$
Luminous Flux	C	6.0		1	lm	$I_F = 20 \text{mA}$
Correlated Color Temperature	CCT	5000		7000	K	$I_F = 20 \text{mA}$
Forward Voltage	VF	2.9		3.5	V	$I_F = 20 \text{mA}$
Color Rendering Index	Ra	70				$I_F = 20 \text{mA}$
Reverse Current	IR			10	uA	$V_R=5V$
Spectral Line Half Width	Δλ		30		nm	I _F =20mA
Viewing Angle	2 θ 1/2		120		Deg.	$I_F = 20 \text{mA}$

Notes: 1. Tolerance of Luminous Intensity $\pm 10\%$.

- 2. Tolerance of CCT \pm 150K.
- 3. Tolerance of Forward Voltage ±0.05 V.
- 4. Optical characteristic is measured by HB's equipment.

◆ BIN range

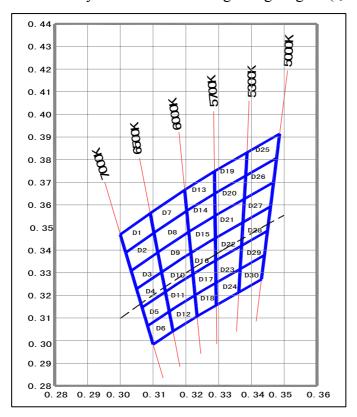

Forward voltage (tolerance is ± 0.05 V @ I_F =20mA):

BIN CODE	Min.(V)	Max. (V)
S	2.9	3.0
T	3.0	3.1
U	3.1	3.2
V	3.2	3.3
W	3.3	3.4
X	3.4	3.5

Luminous intensity (tolerance is $\pm 10\%$ @ I_F=20mA):

BIN CODE	Min.(mcd)	Max. (mcd)
S	1860	2170
T	2170	2480
U	2480	2790

Chromaticity Coordinates & Bin grading diagram(I_F=20mA):

◆ Soldering Conditions (Maximum allowable soldering conditions)

Reflow Soldering			Hand Soldering	
	Lead Solder	Lead-free Solder		
Pre-heat	120 ∼ 150°C	180 ~ 200°C	Temperature	350°C Max.
Pre-heat time	120 sec. Max.	120 sec. Max.	Soldering time	3 sec. Max.
Peak	240°C Max.	260°C Max.		(one time only)
temperature				
Soldering time	10 sec. Max.	10 sec. Max.		
Condition	refer to	refer to		
	Temperature - profile ①.	Temperature - profile ②.		
		$(N_2 \text{ reflow is recommended.})$		

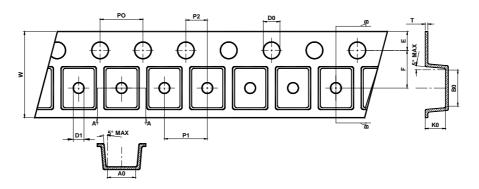

- · Reflow soldering should not be done more than two times.
- · Do not stress its resin while soldering.
- · After soldering, do not warp the circuit board.
- · Pay attention to electrostatic (ESD).

Technical Data Sheet Top View LED

♦ Cautions

1. Package

When moisture is absorbed into the package it may vaporize and expand during soldering. There is a possibility that this can cause exfoliation of the contacts and damage to the optical characteristics of the LEDs. So the moisture proof package is used to keep moisture to a minimum in the package.

2, Storage

Before opening the package: The LEDs should be kept at 5~30°C and 60%RH or less. The LEDs should be used within a year.

After opening the package: The LED must be used within 24 hours, else should be kept at 5~30°C and 30% RH or less. The LEDs should be used within 7days after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, recommended to return the LEDs to the original moisture proof bag and to reseal the moisture proof bag again.

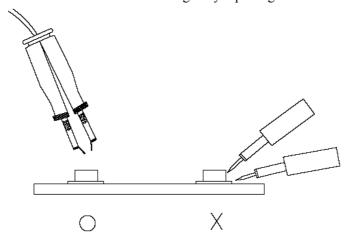

If the LEDs have exceeded the storage time, baking treatment should be performed more than 24 hours at 60 ± 5 °C.

3. Soldering Iron

Each terminal is to the tip of soldering iron temperature less than 300°C for 3 seconds within once in less than the soldering iron capacity 25 W.Leave two seconds and more internals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

4. Repairing

Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

- 5. The LED electrode sections are comprised of a gold plated. The gold surface may be affected by environments which contain corrosive gases and so on. Please avoid conditions which may cause the LED to corrode or discolor. This corrosion or discoloration may cause difficulty during soldering operations. It is recommended that the User use the LEDs as soon as possible.
- 6. Please avoid rapid transitions in ambient temperature, especially in high humidity environments where condensation can occur.

Prepared date: Feb. 2011 www.ledz.com Rev.: 2 Page 11 of 12

Technical Data Sheet Top View LED

7. Static Electricity

- 7.1. These products are sensitive to static electricity charge, and users are required to handle with care. Particularly, if an current and or voltage which exceeds the Absolute Maximum Rating of Products is applied, the overflow in energy may cause damage to, or possibly result in electrical destruction of, the Products. The customer is requested to take adequate countermeasures against static electricity charge and surge when handling Products.
- 7.2. Proper grounding of Products, use of conductive mat, conductive working uniform and shoes, and conductive containers are effective against static electricity and surge.
- 7.3. Ground low-resistance areas where the product contacts, such as metal surfaces of the work platform, with a conductive mat (surface resistance 10^6 - 10^8 Ω).
- 7.4. A tip of soldering iron is requested to be grounded. An ionizer should also be installed where risk of static generation is high.

◆ Notes:

- 1. Above specification may be changed without notice. We will reserve authority on material change for above specification.
- 2. When using this product, please observe the absolute maximum ratings and the instructions for the specification sheets. We assume no responsibility for any damage resulting from use of the product which does not comply with the instructions included in the specification sheets.
